[How to Transition to Tertiary Education - Helpful Hints for People with Autism Spectrum Disorder](#)

Congratulations on deciding to undertake tertiary study at university or TAFE. You will encounter many changes with this transition: a new physical environment, different teaching and learning approaches, and new expectations of you as a student.

Coping with change and transition can be difficult for many people, and if you are on the Autism Spectrum you may find it particularly challenging. The information was developed as two booklets. These booklets discuss many changes to expect, but cannot predict all possible changes you may experience. Each university or TAFE is different; each campus is different; the staff are different; the students are different; and the way you experience it may be different as well. Nevertheless, a good logical approach to planning will help you cope with the transition
